

Introduction

The purpose of the **Accessory Bulletin** is to assist you in finding, selecting, and procuring device-specific components to retrofit your classic Porsche® 911 (Porsche® is a registered trademark of Dr. Ing. h.c. F. Porsche AG.) with modern communications management capabilities via the (1) mounting and (2) electronic integration of your smartphone, portable GPS, or other mobile electronic device (MED). We will update the content of this bulletin from time to time as new MEDs and component accessory products become available.

The patented PCAR MOUNTS™ bracket and brace assembly addresses the most critical step in your 911 modernization project. It creates a sturdy platform for mounting and positioning touchscreen MEDs in the classic Porsche 911. The small cabin and near absence of useable flat surfaces and workable attachment points made this a major challenge. However, the factory-look PCM-1000 series bracket design solves the problem and places the MED in a perfect driver-line-of-sight position for safe, convenient interaction without obscuring windshield vision, interfering with vehicle switch controls, or compromising cabin ventilation.

Components to complete the communications management retrofit transformation of your classic 911 with a mounted and integrated smartphone include: a docking cradle to hold your smartphone; an adapter (most likely not necessary) to configure the cradle to attach to the PCAR MOUNTS bracket assembly; and cables to power the MED and integrate its audio capabilities with your specific stereo head unit.

Examples of vehicle docking cradles for select smartphones are shown as well as some “universal” MED holders. Certain smartphone docks use a ball/socket/locking-nut connecting arrangement such that they will attach to the 17mm milled aluminum ball adapter provided with the PCAR MOUNTS bracket assembly. Some docks have an integrated swivel ball with an adapter plate configured with the AMPS hole pattern that will connect directly to the MED platform of the PCM-1000 bracket. A small subset of docking cradles may require AMPS adapters to implement bracket attachment.

Some miscellaneous cables are shown for the Becker CDR 220 stereo head unit. These cables are used in integrating MEDs with the “AUX” input of this system. Other cables are likely to be specific to your smartphone and your particular stereo head unit.

Website links are provided for certain 3rd party manufacturers and distributors of smartphone docking cradles, adapters, and various cables for stereo integration.

We’ve also included some adapter examples for attaching portable GPS devices (e.g. Garmin, TOM TOM) to the PCAR MOUNTS Bracket System.

Smartphone Docking Cradles and Holders

Select Motorola Docks

- www.motorola.com
- www.amazon.com

Note: These docks are configured with a locking ball/socket connection that inserts directly onto the 17mm ball in the PCAR MOUNT KIT

Droid 3

Droid 4

Droid RAZR MAXX

Droid RAZR MAXX HD

MOTO X

Select iBolt and Pro-Fit-International Docks

- www.pro-fi-intl.com
- www.proclipusa.com
- www.amazon.com

Note: These docks are configured with a locking ball/socket connection that inserts directly onto the 17mm ball in the PCAR MOUNT KIT

Samsung Galaxy S III

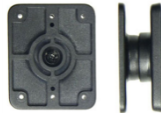

HTC One X and
HTC EVO 4G LTE

30 Pin iPhones

iBolt Universal Dock

Select Brodit and ProClip USA Docks *(various versions for smartphones w/wo cases)*

- www.brodit.com
- www.proclipusa.com

Note: these docks connect directly to the PCAR MOUNTS MED Platform via an integral swivel ball with AMPS hole pattern adapter

**iPhone 4S, 4
with case**

**iPhone 5
with case**

**iPhone 5
without case**

**Samsung Galaxy S III
w/wo case**

Miscellaneous Smartphone Docks

- www.arkon.com
- www.panavise.com
- www.samsung.com

Note: Most of these docks are configured with a locking ball/socket connection that inserts directly onto the 17mm ball in the PCAR MOUNT kit

This dock connects to PCM-1000 Series using a T slot adapter plate

**Arkon Slim-Grip
Universal Holder**

**Arkon SuperCharge for
iPhone 4S, 4, and 3GS**

**PanaVise
Universal Holder**

**Samsung
Universal Dock**
